DETAILED ACTION

1. Claims 22-42 are presented for examination. Claims 1-21 have been cancelled.

Priority

Applicant has not complied with one or more conditions for receiving the benefit of an earlier filing date under 35 U.S.C. 119(e) and 120 as follows:

- 2. An application in which the benefits of an earlier application are desired must contain a specific reference to the prior application(s) in the first sentence of the specification or in an application data sheet (37 CFR 1.78(a)(2) and (a)(5)). The specific reference to any prior nonprovisional application must include the relationship (i.e., continuation, divisional, or continuation-in-part) between the applications except when the reference is to a prior application of a CPA assigned the same application number.
- 3. Application No. 09/761035 is not a CIP of Application No. 09/024278.
- 4. Application No. 09/761035 has no common inventor with Application No. 09/024278.
- 5. Application No. 09/024278 does not claim priority of Application No. 60/176457.
- 6. Application No. 60/176457 is a provisional application, and therefore, cannot become an issued patent.
- 7. Applicant's claim for domestic priority under 35 U.S.C. 119(e) is acknowledged. However, the provisional application 60/037354 upon which priority is claimed fails to provide adequate support under 35 U.S.C. 112 for claims 22-42 of this application.

Oath/Declaration

Art Unit: 2125

8. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

The specification to which the oath or declaration is directed has not been adequately identified. See MPEP § 602.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

9. Claims 22-42 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 22, 29, and 37 recite the limitations "the extrusion and cooling process" in line 6.

Claims 22, 29, and 37 recite the limitations "the circumference of said tube" in line 7. Claims 22, 29, and 37 recite the limitations "the position of said tube" in lines 8 and 13. Claims 22, 29, and 37 recite the limitations "the collapsing and flattening of said tube" in line 14. There is insufficient antecedent basis for these limitation(s) in the claim(s).

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground

provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

10. Claims 22-42 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-21 of U.S. Patent No. 6,592,786 to Joseph. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claim(s) are generally broader than the claims in the parent application. Broader claims in a later application constitute obvious double patenting of narrow claims in an issued patent. See In re Van Ornum and Stang, 214, USPQ 761, 766, and 767 (CCPA) (The court sustained an obvious double patenting rejection of generic claims in a continuation application over narrower species claims in an issued patent); In re Vogel, 164 USPQ 619, 622, and 623 (CCPA 1970) (Generic application claims specifying "meat" is obvious double patenting of narrow patent claims specifying "pork"). Claims 22-42 of the instant application recite the limitations of molten material in the form of a tube, a sizing sensor located proximate to said tube, a lay flat sensor located proximate to said tube in a position above said sizing sensor, and a feedback control system. These limitations are broader than the limitations of molten material in the form of a tube which is in a molten state below a frost line and which is in a solid state above said frost line, a sizing sensor located proximate to said tube in a position below said frost line, a lay flat sensor located proximate to said tube in a position above said frost line, and a negative feedback control system in the claims of the parent application.

Conclusion

Application/Control Number: 10/618,917

Art Unit: 2125

11. The prior art or art made of record and not relied upon is considered pertinent to applicant's disclosure.

The following patents or publications are cited to further show the state of the art with respect to control of lay-flat width of a film tube in response to sensing the tube width.

U.S. Pat. No. 4,192,637 to Chong.

The following patents or publications are cited to further show the state of the art with respect to sensing the position of a thermoplastic projection prior to collapsing.

U.S. Pat. No. 6,329,629 to Grewell.

12. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sean P. Shechtman whose telephone number is (703) 305-7798. The examiner can normally be reached on 9:30am-6:00pm, M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Leo P. Picard can be reached on (703) 308-0538. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
